

# SmartPV APIS UL

APIS1200-UL / APIS1500-UL / APIS1750-UL

Optimised Designs for the USA Market

## APIS UL-i20

| Mechanical characteristics                           |   |
|--|---|
| Inverter Power Module dimensions (H / W / D)         | 2100 x 2000 x 780 mm / 82,67 x 78,74 x 30,70 in |
| Inverter Disconnection Module dimensions (H / W / D) | 2100 x 1100 x 750 mm / 82,67 x 43,3 x 29,52 in  |
| Container dimensions (H / W / D)                     | 2900 x 6000 X 2440 mm / 20' x 8' x 9'6"         |
| Weight (5)   | 8396 kg / 18510 lbs                             |
| Maximum fresh air consumption                        | 8000 (2 x 4000) m <sup>3</sup> /h               |
| Environment rating                                   | NEMA 3R, IP54                                   |
| Medium Voltage Stage                                 |   |
| Transformer  | Pad Mounted                                     |
| Protections  | 2 x GPTech GPDM -I                              |

## APIS UL-skd

| Mechanical characteristics                           |   |
|--|---|
| Inverter Power Module dimensions (H / W / D)         | 2300 x 2000 x 845 mm / 90,55 x 78,74 x 30,70 in |
| Inverter Disconnection Module dimensions (H / W / D) | 2162 x 1100 x 750 mm / 85,12 x 43,3 x 29,52 in  |
| Skid dimensions (H / W / D)                          | 2522 X 9000 x 2100 mm / 99,3 x 354,4 x 82,7 in  |
| Weight (5)   | 12000 kg / 26455 lbs                            |
| Maximum fresh air consumption                        | 12000 (2 x 6000) m <sup>3</sup> /h              |
| Environment rating                                   | NEMA 3R, IP54                                   |
| Medium Voltage Stage                                 |   |
| Transformer  | Pad Mounted                                     |
| Protections  | 2 x GPTech GPDM -O                              |

|   | APIS 1200-UL        | APIS 1500-UL  | APIS 1750-UL        |
|---|---------------------|---|---------------------|
| <b>DC Input</b>   |                     |   |                     |
| Voltage range (MPPT) <sup>(1)</sup>                       | 395 - 825 Vdc       | 495 - 825 Vdc   | 585 - 825 Vdc       |
| MPPT Inputs   |                     | 2   |                     |
| Maximum DC voltage  |                     | 1000 Vdc  |                     |
| Maximum input current                                     |                     | 3060 A  |                     |
| DC inputs (optional external box)                         |                     | 2 0-40 (2x10 - 2x20). Protected by fuses                      |                     |
| <b>AC Output</b>  |                     |   |                     |
| Transformer output. Medium AC voltage <sup>(5)</sup>      |                     | 24 kV   |                     |
| Frequency rated   |                     | 50/60 Hz  |                     |
| Frequency operation range                                 |                     | 47 - 63 Hz  |                     |
| Rated AC power @ 50°C                                     | 1,12 (2 x 0,56) MVA | 1,4 (2 x 0,7) MVA   | 1,66 (2 x 0,83) MVA |
| Rated AC power @ 25°C                                     | 1,2 (2 x 0,6) MVA   | 1,5 (2 x 0,75) MVA  | 1,78 (2 x 0,89) MVA |
| Rated AC power @ 50°C and PF of 0,9                       | 1,0 (1 x 0,5) MW    | 1,26 (2 x 0,63) MW  | 1,5 (2 x 0,75) MW   |
| Inverter output. Maximum output current                   |                     | 2900 (2 x 1450) A   |                     |
| Total Harmonic Distortion (THD)                           |                     | <3%   |                     |
| Power Factor rated power                                  |                     | adjustable (0.9 inductive ... 0.9 capacitive)                 |                     |
| Galvanic insulation                                       |                     | Yes   |                     |
| <b>Efficiency</b>   |                     |   |                     |
| Maximum European efficiency <sup>(2)</sup>                | 97,29%              | 97,72%  | 98,00%              |
| Maximum CEC efficiency <sup>(3)</sup>                     | 97,18%              | 97,63%  | 97,92%              |
| Inverter self-consumption at night                        |                     | =400 (2 x 200) W  |                     |
| Inverter self-consumption in operation <sup>(4)</sup>     |                     | =6 (2 x 3) kVA  |                     |
| <b>Ambient conditions</b>                                 |                     |   |                     |
| Operation temperature                                     |                     | -4°F/140°F (-20°C/60°C)                                       |                     |
| Operation ambient temperature (without derating)          |                     | -4°F/122°F (-20°C/50°C)                                       |                     |
| Storage and transport temperature                         |                     | -22°F/149°F (-30°C/65°C)                                      |                     |
| Maximum relative humidity                                 |                     | 95% without condensation                                      |                     |
| Maximum altitude above the sea level                      |                     | 3000 m  |                     |
| <b>AC Protections</b>                                     |                     |   |                     |
| Inverter output AC overvoltage protection                 |                     | Class II  |                     |
| Anti-islanding  |                     | Yes   |                     |
| Grid voltage variations                                   |                     | Yes   |                     |
| Frequency failures  |                     | Yes   |                     |
| Asymmetric currents                                       |                     | Yes   |                     |
| Low Voltage Ride Through (LVRT) Capability                |                     | Yes   |                     |
| <b>DC Protections</b>                                     |                     |   |                     |
| DC overvoltage protection                                 |                     | Class II  |                     |
| Inverter shutting down on overload error                  |                     | Yes   |                     |
| PV-field isolation detector                               |                     | Yes   |                     |
| Panel Disconnection Capability                            |                     | Yes. Contactor  |                     |
| <b>Other Protections</b>                                  |                     |   |                     |
| Breaker protections of auxiliary systems                  |                     | Yes   |                     |
| Auxiliary systems overvoltage protection                  |                     | Yes   |                     |
| <b>Power Control Features</b>                             |                     |   |                     |
| Reactive control by external signal                       |                     | Yes   |                     |
| Reactive control by internal configuration                |                     | Yes. Timetable PF configuration or voltage dependent function |                     |
| Reactive injection in LVRT                                |                     | Yes. Three different operation modes                          |                     |
| Over frequency active power response                      |                     | Yes. Configurable droop                                       |                     |
| Ramp rate control   |                     | Yes. Under irradiance value restriction                       |                     |
| External power limitation                                 |                     | Yes. Control allows continuous limit values                   |                     |
| <b>Interfaces</b>   |                     |   |                     |
| Touch-HMI   |                     | Yes   |                     |
| MODBUS RTU communication protocol                         |                     | Yes   |                     |
| Field bus connection with RS485                           |                     | Yes   |                     |
| Luminous indicator, start/stop control and emergency stop |                     | Yes   |                     |
| Remote monitoring system, with GSM/GPRS modem             |                     | Optional  |                     |
| <b>Legal standards</b>                                    |                     |   |                     |
| UL1741 <sup>(6)</sup>                                     |                     | Yes   |                     |
| United States - UL Listing Mark                           |                     | Yes   |                     |
| Canada - cUL Listing Mark                                 |                     | Yes   |                     |
| IEEE 1547   |                     | Yes   |                     |
| CSI/CEC Performance Testing (California)                  |                     | Yes   |                     |
| IEC 62109-1, IEC 62109-2                                  |                     | Yes   |                     |

- Notes**
- At VAC, nom and cos $\phi$ = 1
  - Inverter self-consumption is not considered in the efficiency measurement. Medium voltage transformer is not considered in the efficiency measurement (Typical transformer efficiency > 99%)
  - Self-consumption at rated operation
  - Self-consumption in inverters is not considered in the efficiency measurement. A 33kV/ 240-300-355-430V transformer is considered
  - Estimated. Customized MV transformer configuration
  - For UL certification, please, consult special sales conditions
