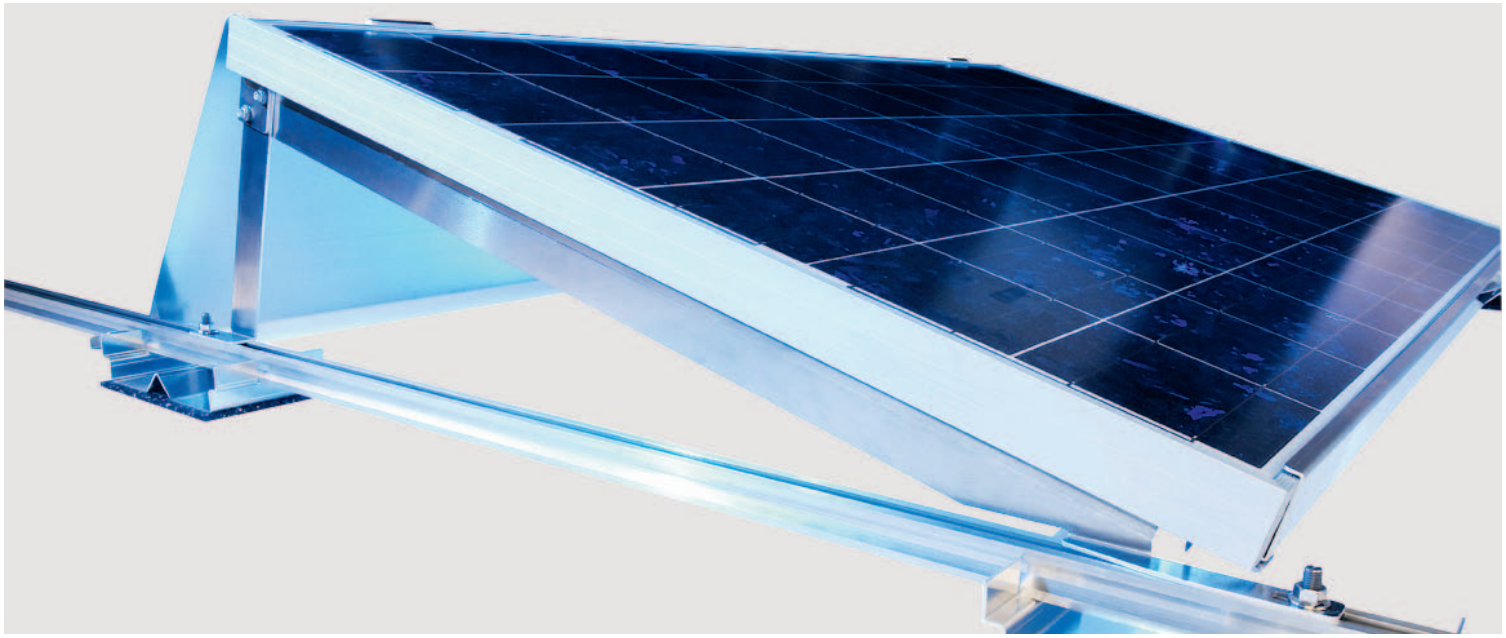
Gehrlicher Solar
Imagine the Energy



GehrTec® Aero
The aerodynamic PV flat roof system

GehrTec® Aero is an aerodynamic PV flat roof system, that can be installed without penetrating the roof. Profit from the reduced-weight modular construction system and the high adaptability to the various roof situations.

GehrTec® Aero The aerodynamic PV flat roof system

Your Advantage

Optimal economy
The installation of the reduced-weight modular system is very quick, as no penetrations of the roof are necessary. It is not necessary to weigh down the system with ballast.

Highest quality and safety
All components are of high quality stainless steel and aluminium. The system components have been structurally calculated and certified by TÜV for increased loads from snow and wind. Cooling openings provide the best possible ventilation of the modules and therefore also optimal yields.

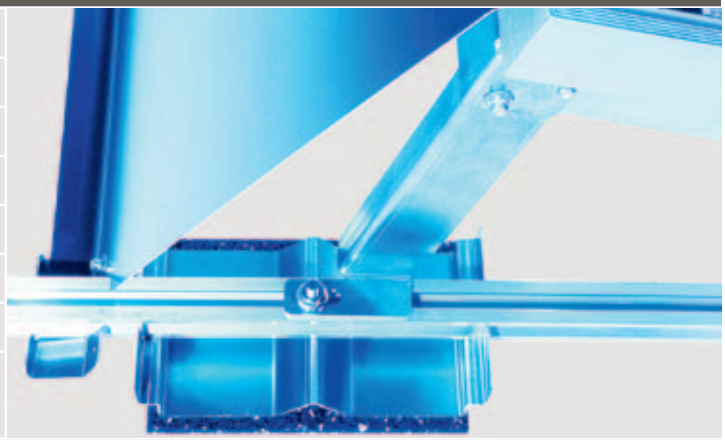
Long life cycle
Thanks to structurally calculated system components and robust bolted connections the high stability of the system is ensured for the long term. Due to the non-cutting bolt connections the roofing is not damaged.

Great flexibility
The system can be permanently fixed or fixed to allow removal.

Competent service
The system will be pre-assembled by us to suit the particular requirements.

GehrTec® Aero

Technical Data	
Place of use	flat roof
System pitch	15°, 17°, 19°
Installation	pre-assembled system components
Solar modules	framed modules
Module dimensions	max. 2,000 x 1,000 mm
Module orientation	horizontal
Module fixing	module supports, mounting brackets
Rail system	GehrTec® Aero Box, Rear wall, GehrTec® Rail System
Securing system	patented holding-down system enables use in high wind zones and contributes to safety of the system
with area loadings	under 8 kg/m² depending on the module



A holding-down securing system can be installed as an option.
