

## Photoelectricity System Installation/Technical Specifications

This is an support for small photoelectricity system, widely used in smooth roof, broad ground, travels, household road light, for emergency purpose, etc. It has a simple design, so its installation only takes a few minutes by simple tools. What's more, it is much more practical, convenient carry-on.

1. Quick installation. The simple design results in short time installation and only needs simple tools.
2. Almost adapts to all photoelectricity parts, so you can place orders from different photoelectricity manufactures.
3. Effectively anti-corrosion and long life. All parts are made of aluminum alloy or stainless steel.
4. 10 years warranty.
5. Its angle can be adjusted from 15 degree to 45 degree

Technical specifications:  
Anti-snow ability: up to 1.4KN/M<sup>2</sup>  
Photoelectricity parts: frame included  
Material thickness: 3mm  
Material color: natural color  
Strut: extruded aluminum pipe  
Fasteners: Stainless steel
