

Pole mounts is ideal for a small solar system, but can be combined into a parallel array, creating a PV power station. It's easy-to-assemble, specially designed aluminium stands and clamps makes installation easy, requiring only simple tools.

The structure can be configured to support 2, 4, or 8 PV modules on a single pole.

All parts are anticorrosive with a 10-year warranty.

### Key Benefits

- Highly adaptable to many types of terrain and environments
- Easy installation requiring only simple tools
- Easy configuration - build a single unit or connect the systems into an array
- Cost-effective
- Engineered to sustain high wind loads with anticorrosive treatments to be durable in a variety of climates

### Technical Specs

<b>Install Site</b>	<b>Open Space Ground</b>
<b>Module Slope</b>	<b>Up to 60°</b>
<b>Height</b>	<b>Custom Fit</b>
<b>Wind Load</b>	<b>190 km/h</b>
<b>Snow Load</b>	<b>1.5 kN/m<sup>2</sup></b>
<b>Module Type</b>	<b>Crystal Silicon, Thin Film</b>
<b>Orientation</b>	<b>Vertical or Horizontal</b>
<b>Size</b>	<b>Custom Fit</b>
<b>Support Rail</b>	<b>Extruded Aluminum</b>
<b>Warranty</b>	<b>10-year Durability on Material</b>
