## POWER-FAB Ballasted Roof Mounts Are a Unique Solar Solution:

- No roof penetrations necessary
- Structure held in place by the weight of concrete blocks that sit in ballast trays
- EPDM rubber on bottom of rack surfaces to increase friction and protect roofing
- All aluminum construction
- Stainless steel hardware
- Tilt angles up to 45-degrees
- Top-clamping racking components
- Simple design saves labor
- Designed for areas with 90mph maximum wind speeds and Exposure C category
- Consult distributor for areas with heavy snow loads

### BALLAST BLOCKS

The ballast blocks are standard concrete blocks called "cap blocks" and are supplied by the installer.

Nominal dimensions of "cap blocks" are 2.25"x8"x16." They weigh 14.5 pounds each.
