TerraMount

TerraMount

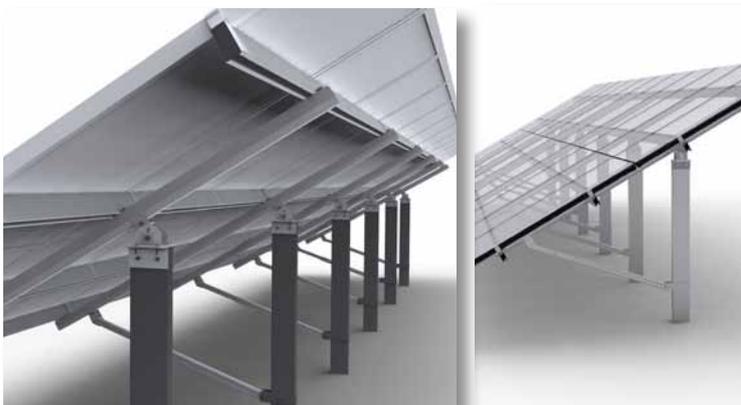

When it comes to ground mounting solar panels stability is vital, as well as ease of installation and simple deployment to site. Lock Solar's TerraMount offers all of these necessities as well as high strength and corrosion resistance, to withstand even the harshest of weather conditions.

TerraMount requires no foundation but instead uses pile driven technology which can be erected very quickly and effectively.

As with all Lock Solar mounting products TerraMount is universal thanks to the adjustable structures and clamps. Up to 2 rows of modules can be mounted in a portrait orientation and the array can be extended to accommodate any size project.

With pre-assembled parts, minimum tooling requirements and never any need for cutting or welding on site, TerraMount truly is easy to install.

SPECIFICATIONS

Angle	10-50 degrees (to suit geographical location)
Wind load	60 m/s
Snow load	1.6 kN/m ²
Module Orientation	Portrait
Standards/Certification	AS/NZS 1170.2 & MCS
Material	6060-T6 Aluminium and Galvanised Steel
Warranty	12 years
