

Flat ROOF MOUNTING SYSTEM for FRAMED Solar Panel

This is a very innovative mounting system. Highly pre-fabricated into almost only **one** module.

The installation is extremely labor saving and fast, so your installation cost is reduced to the minimum. No adjusting, no sawing in the field. What you need is just to trigger an cordless screwdriver!

Key features:

- Extremely fast and labor saving
- Modular designed, pre-assembled
- Adaptable to rooftop unevenness $\leq 5^\circ$, self-adjustment
- Layout flexibility, adapt to complicate rooftop
- Self-grounding, reduce grounding wire and lug

PRODUCT SPECIFICATION:

Design Condition	Surface roughness: B and C
Materials	Aluminum 6063 and stainless steel 304
Tilt angles	10°,15°, 20° , 25°
Roof application	PVC, TPO, BUR, SMS of low slope roof
Average distributed weight	2.3 ~ 3.2 PSF (connected)
	5.7 ~ 6.5 PSF (ballasted,90 mph)
Module compatibility	Major brands
Rooftop unevenness	≤5°
Grounding	Self-grounding (UL 2703)
Layout flexibility	Flexible
Installation rates	9 pieces/2 persons/15 minutes
Warranty	15 years
