

Clamp-Tin Roof PV Mounting System

Product Features:

1. Extremely low cost solution;
2. Fewer components. Modular design, all the parts are prefabricated in factory. So only 6 components needed to be assembled in the field. See left pictures ;
3. Fewer tools needed. Highly standardized. Only simple tools needed. About 3 tools. See right pictures.

Product Specification:

1. Roof Type: tin roof
2. Material: Al6005 and SS304;
3. PV Type: major brand PV module with or without frame;
4. Module Orientation: portrait or landscape;
5. Surface B, C
Roughness:
6. Wind Speed: <60m/s;
7. Snow Load: < 1.4KN/m²;
8. Tilt Angle: flush with roof top;
9. Average Distributed Weight: 0.27PSF(PV excluded)
