Lock Solar Tilt Kit

The telescopic adjustable legs of the Lock Solar Tilt Kit can be adapted to suit individual customer needs, thanks to a variable tilt angle and interconnection with our Rack-in-a-Box™ mounting system. Our Tilt Kit allows the modules to be arranged next to each other to suit any length array, whether in a residential or commercial application.

Secure

Every Lock Solar Tilt Kit is supplied with our anti-theft screws, offering peace of mind for the end user and all our products are made in our ISO 9001:2008 certified factories ensuring internationally recognised quality management.

Universal

This adaptable system was specifically designed to allow problem free customisation for the most diverse requirements on flat or pitched roofs and through its adjustability it is truly universal in its application.

Mounting

Designed by installers for installers, Lock Solar's Tilt Kit is easy to install saving you time and hassle. All components are made from premium grade aluminium or stainless steel and their high corrosion resistance ensures maximum service life - all backed with an industry first 12 year warranty.
